-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-62 and 117-143, drawn to alignment system for lithographic apparatus, classified in class 700, subclass 114.
 - II. Claims 63-78 and 171-183, drawn to method aligning a work piece for manufacturing of a micro device, classified in class 355, subclass 53.
 - III. Claims 79-84, drawn to alignment for use in manufacture of micro device, classified in class 356, subclass 400.
 - IV. Claims 85-143, drawn to method of automatic process control for the manufacture, classified in class 355, subclass 55.
 - V. Claims 144-170 and 202, drawn to lithographic projection apparatus, classified in class 250, subclass 548.
 - VI. Claims 184-201, drawn to metrology system for a lithographic apparatus, classified in class 356, subclass 601.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and V and VI are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the alignment system of invention I or the metrology system of

Art Unit: 2878

invention VI is not specifically limited to the lithographic projection apparatus of invention II.

3. Inventions II, III and IV are related as separate and distinct inventions. The inventions are distinct if it can be shown that either that they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different invention each have separate utility as an alignment mark, a method of aligning a work piece and a method of automatic process control.

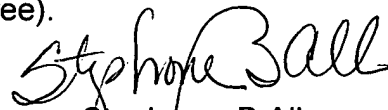

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephone B. Allen whose telephone number is 571-272-2434. The examiner can normally be reached on M-F 08:30-5:00PM.
